$N(1650)$ DECAY MODES

The following branching fractions are our estimates, not fits or averages.

Mode	Fraction (Γ_j/Γ)
Γ_1 $N\pi$	55–90 %
Γ_2 $N\eta$	3–10 %
Γ_3 ΛK	3–11 %
Γ_4 ΣK	
Γ_5 $N\pi\pi$	10–20 %
Γ_6 $\Delta\pi$	1–7 %
Γ_7 $\Delta(1232)\pi$, D -wave	
Γ_8 $N\rho$	4–12 %
Γ_9 $N\rho$, $S=1/2$, S -wave	
Γ_{10} $N\rho$, $S=3/2$, D -wave	
Γ_{11} $N(\pi\pi)_{S\text{-wave}}^{I=0}$	<4 %
Γ_{12} $N(1440)\pi$	<5 %
Γ_{13} $p\gamma$	0.04–0.18 %
Γ_{14} $p\gamma$, helicity=1/2	0.04–0.18 %
Γ_{15} $n\gamma$	0.003–0.17 %
Γ_{16} $n\gamma$, helicity=1/2	0.003–0.17 %

Note: Signs of couplings from $\pi N \rightarrow N\pi\pi$ analyses were changed in the 1986 edition to agree with the baryon-first convention; the overall phase ambiguity is resolved by choosing a negative sign for the $\Delta(1620) S_{31}$ coupling to $\Delta(1232)\pi$.

$N(1650)$ FOOTNOTES

- ¹ ARNDT 95 finds two distinct states.
- ² BATINIC 95 finds two distinct states. This second resonance was associated with the $N(2090) S_{11}$.
- ³ The two BAKER 77 entries are from an IPWA using the Barrelet-zero method and from a conventional energy-dependent analysis.
- ⁴ LONGACRE 77 pole positions are from a search for poles in the unitarized T-matrix; the first (second) value uses, in addition to $\pi N \rightarrow N\pi\pi$ data, elastic amplitudes from a Saclay (CERN) partial-wave analysis. The other LONGACRE 77 values are from eyeball fits with Breit-Wigner circles to the T-matrix amplitudes.
- ⁵ From method II of LONGACRE 75: eyeball fits with Breit-Wigner circles to the T-matrix amplitudes.
- ⁶ ARNDT 98 also lists pole residues, which display more model dependence than do the associated pole positions.
- ⁷ See HOEHLER 93 for a detailed discussion of the evidence for and the pole parameters of N and Δ resonances as determined from Argand diagrams of πN elastic partial-wave amplitudes and from plots of the speeds with which the amplitudes traverse the diagrams.
- ⁸ LONGACRE 78 values are from a search for poles in the unitarized T-matrix. The first (second) value uses, in addition to $\pi N \rightarrow N\pi\pi$ data, elastic amplitudes from a Saclay (CERN) partial-wave analysis.
- ⁹ BAKER 79 fixed this coupling during fitting, but the negative sign relative to the $N(1535)$ is well determined.
- ¹⁰ The overall phase of BAKER 78 couplings has been changed to agree with previous conventions. Superseded by SAXON 80.
- ¹¹ The range given for DEANS 75 is from the four best solutions.
- ¹² LONGACRE 77 considers this coupling to be well determined.
