## $\Delta(1750)$ FOOTNOTES

<sup>1</sup> CHEW 80 reports four resonances in the  $P_{31}$  wave — see also the  $\Delta(1910)$ . Problems with this analysis are discussed in section 2.1.11 of HOEHLER 83.

<sup>2</sup> ARNDT 04 gives no corresponding Breit-Wigner parameters for this state, because the mass so obtained is about 500 MeV higher than that suggested by the position of the pole.
