| 1922±14 | | ⁹ ANTIPOV | 77 CIBS | 25 $\pi^- p \rightarrow p3\pi$ |

¹ From the first PWA solution.

² From a partial-wave analysis of the data.

³ From an amplitude analysis of the reaction $\pi^+\pi^- \rightarrow 2\pi^0$.

⁴ Energy-dependent analysis.

⁵ Single energy analysis.

⁶ From solution A of amplitude analysis of data on $\bar{p}p \rightarrow \pi\pi$. See however KLOET 96 who fit $\pi^+\pi^-$ only and find waves only up to $J = 3$ to be important but not significantly resonant.

⁷ From solution B of amplitude analysis of data on $\bar{p}p \rightarrow \pi\pi$. See however KLOET 96 who fit $\pi^+\pi^-$ only and find waves only up to $J = 3$ to be important but not significantly resonant.

⁸ $I(J^P) = 0(4^+)$ from amplitude analysis assuming one-pion exchange.

⁹ Width errors enlarged by us to $4\Gamma/\sqrt{N}$; see the note with the $K^*(892)$ mass.
