$\Xi_c'^+$	$I(J^P) = \frac{1}{2}(\frac{1}{2}^+)$ Status: $\ast\ast\ast$

The $\Xi_c'^+$ and $\Xi_c'^0$ presumably complete the SU(3) sextet whose other members are the Σ_c^{++}, Σ_c^+, Σ_c^0, and Ω_c^0: see Fig. 3 in the note on Charmed Baryons just before the Λ_c^+ Listings. The quantum numbers given above come from this presumption but have not been measured.

$\Xi_c'^+$ DECAY MODES

The $\Xi_c'^+-\Xi_c^+$ mass difference is too small for any strong decay to occur.
