Σ_b

$I(J^P) = 1(\frac{1}{2}^+)$ Status: ***
I, *J*, *P* need confirmation.

In the quark model Σ_b^+, Σ_b^0, Σ_b^- are an isotriplet (*uub*, *udb*, *ddb*) state. The lowest Σ_b ought to have $J^P = 1/2^+$. None of *I*, *J*, or *P* have actually been measured.
